

UNIVERSITÄT ZU LÜBECK

Module Guide for the Study Path

# Bachelor Psychology 2020

## 1st semester

Human Biology (PY1000-KP05, PYHumBiol)	1
Developmental Psychology (PY1100-KP07, EP)	3
General Psychology (PY1200-KP07, AP)	5
Basics of Experimental and Scientific Work (PY1300-KP06, Empirie)	7
Statistics 1 (PY1800-KP06, Statistik1)	9

## 2nd and/or 3rd semester

Social Psychology (PY2100-KP07, SP)	11
-------------------------------------	----

## 2nd semester

History, theory, ethics and law of psychology and psychotherapy (PY1601-KP08, GTER)	13
Differential Psychology (PY2200-KP07, DiffPsych)	15
Basics in statistics 2 (PY2300-KP06, Statistik2)	17

## 2nd semester at the earliest

Psyche in Controversy - Classics of Philosophy (PS1520-KP04, PsyWider)	19
Practical Course Physiology (PY2903-KP04, PY2903, PraktPhys)	20

## 3rd or 5th semester

Coaching in the Work Context (PY3203-KP04, Coaching)	22
------------------------------------------------------	----

## 3rd semester

Biological Psychology (PY2000-KP07, BioPsych)	23
Test Theory (PY2250-KP06, PY2250, TT)	25
Cognitive ability testing and personality assessment (PY2400-KP06, PsychDiag)	26
Basic medical knowledge incl. pharmacological knowledge for psychotherapists (PY2601-KP07, MedPharma)	27

## 3rd semester at the earliest

Phenomenon Memory (PY1909-KP04, PY1909, PhaenGed)	29
Specialization Biological Psychology (PY2501-KP04, VertBioPsy)	31
Emotion Regulation (PY2905-KP04, PY2905, Emreg)	32
Psychologie in movies (PY2910-KP04, PY2910, PsychFilm)	34
Psychoanalysis - science or pseudoscience (PY2924-KP04, Psychoan)	35

## 4th semester

Clinical Psychology / Disturbance Theory Inc. Preventive and Rehabilitative Concepts of Psychotherapeutic Action (PY2702-KP10, KliPsy)	36
Research-oriented internship (PY2801-KP06, FoPra)	38
Cognitive-affective neuroscience (PY3001-KP06, KogNeuroBA)	40

## 4th semester at the earliest

Development of Professionalism in Health Care (PY1903-KP04, PY1903, EbiH)	42
Evidence-based Clinical Practice in Psychology: Finding of a relevant Study and Applying it (PY2901-KP04, PY2901, ebkHPsych)	44
Nonparametric Methods (PY2912-KP04, PY2912, NonparaVer)	46
Occupation qualifying for a profession 1 - Entry into the practice of psychotherapy (PY3800-KP08, BQT1)	47

## 5th semester

Neuropsychology - Disorders and Diagnostics (PY2611-KP06, NeuroStoer)	49
Introduction to the therapy of mental disorders (PY2701-KP08, PsychThera)	51
Educational Psychology (PY3100-KP06, PY3100, PaedaPsych)	53
Work and Organisational Psychology (PY3200-KP06, PY3200, AuO)	55
orientation internship (PY3701-KP06, OrientPrak)	57

## 5th semester at the earliest

Bachelor Thesis (PY3900-KP12, PY3900, PYArbeit)	59
-------------------------------------------------	----

## Arbitrary semester

Interprofessional Communication and Care (GW3020-KP05, PT3010-KP05, IpKoV)	61
Functional Neurological Disorders (MZ3510-KP04, FNS)	63
Planetary Health - Healthy Earth, Healthy People (PS1510-KP04, PIHe)	64
Sexual health (PS4650-KP04, SexGh)	66
Test Subject Hours (PY1400-KP01, PY1400, VPStd)	67
Prevention and Health Promotion (PY1605-KP04, Praevges)	68
Einführung in Sportpsychologie (PY1606-KP04, SportPsych)	70
Expertise und Training (PY1607-KP04, ExpTrai)	72
Emotion Psychology (PY1701-KP04, EmoPsych)	74
Work Psychology (PY1711-KP04, ArbeiPsy)	75
Family Psychology (PY1905-KP04, PY1905, FamPsych)	76
Hunting, gathering, parking? Concepts of Gender in Psychology (PY1906-KP04, Gender)	77
Psychophysics And Modelling of Behavioural Data (PY1910-KP04, PY1910, PsychphysV)	78
Introduction to Qualitative Research (PY1911-KP04, EinstQuali)	79

Transculturality in Psychotherapeutic and Psychiatric Settings (PY1912-KP04, Transkultu)	80
Contested psyches? Theoretical, Ethical and Historical Debates in the Psychological Humanities (PY1914-KP04, PsyHum)	81
Diversity Psychology (PY1915-KP04, DiversPsy)	83
Becoming Human - Topics, theories, and methods of early human development (PY2101-KP04, Human)	85
Media Psychology (PY2904-KP04, PY2904, MedienPsy)	86
Developmental psychology of adult age (PY2913-KP04, EPErwachs)	88
Stimulus programming using Psychtoolbox (PTB) with Matlab® (PY2919-KP04, StimPTB)	89
Advanced Methods in Stimulus programming using Psychtoolbox (PTB) with Matlab (PY2926-KP04, StimPTB2)	91
Work- an Organizational Psychology in Practice (PY3202-KP04, AOPP)	93
Statistical Cognition - Recognizing and avoiding common statistical traps (PY4011-KP04, StatDenke)	95

<b>PY1000-KP05 - Human Biology (PYHumBiol)</b>		
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each winter semester	<b>Credit points:</b> 5
<b>Course of study, specific field and term:</b> <ul style="list-style-type: none"> <li>• Bachelor Psychology 2027 (compulsory), psychology, 1st semester</li> <li>• Bachelor Psychology 2020 (compulsory), psychology, 1st semester</li> <li>• Bachelor Psychology 2016 (compulsory), psychology, 1st semester</li> </ul>		
<b>Classes and lectures:</b> <ul style="list-style-type: none"> <li>• ... (lecture, 2 SWS)</li> <li>• ... (seminar, 1 SWS)</li> </ul>	<b>Workload:</b> <ul style="list-style-type: none"> <li>• 105 Hours private studies</li> <li>• 45 Hours in-classroom work</li> </ul>	
<b>Contents of teaching:</b> <ul style="list-style-type: none"> <li>• Anatomy of an animal cell</li> <li>• Energy metabolism of the cell</li> <li>• Classic and molecular genetics</li> <li>• Epigenetics</li> <li>• Evolution</li> <li>• Principles of neurophysiology</li> <li>• Sensory physiology</li> <li>• Learning and memory</li> <li>• Hormones</li> <li>• Immunology</li> </ul>		
<b>Qualification-goals/Competencies:</b> <ul style="list-style-type: none"> <li>• The students acquire basic knowledge of selected topics in human biology.</li> <li>• They understand basic aspects of cellular energy metabolism and underlying cellular structures and can apply this knowledge to the analysis of different metabolic situations.</li> <li>• They elaborate the subject areas of genetics and epigenetics to differentiate between them and recognise, compare and understand their diverse functions.</li> <li>• They have basic knowledge of the function and anatomy of the nervous system, memory and senses. They understand and reflect the existing connections and can apply these skills.</li> <li>• They know the mechanisms of evolution and understand the origin of species on this basis. They are able to apply their knowledge to aspects of species protection.</li> <li>• They know the mechanisms of evolution and understand the origin of species on this basis. They are able to apply their knowledge to aspects of species protection.</li> <li>• They have basic knowledge about the immune system and know its essential functions.</li> <li>• They understand the mechanisms and functions of selected central nervous and peripheral hormone systems.</li> </ul>		
<b>Grading through:</b> <ul style="list-style-type: none"> <li>• written exam</li> </ul>		
<b>Responsible for this module:</b> <ul style="list-style-type: none"> <li>• <a href="#">Dr. rer. nat. Carla Schulz</a></li> </ul>		
<b>Teacher:</b> <ul style="list-style-type: none"> <li>• <a href="#">Institute for Biology</a></li> <li>• <a href="#">Dr. rer. nat. Carla Schulz</a></li> <li>• <a href="#">Prof. Dr. rer. nat. Christian Karsten</a></li> <li>• <a href="#">Prof. Dr. rer. nat. Henriette Kirchner</a></li> <li>• <a href="#">Dr. rer. nat. Rebecca Ölkrug</a></li> </ul>		
<b>Literature:</b> <ul style="list-style-type: none"> <li>• Campbell: Biology - (11th edition), Prentice Hall International, 2019</li> </ul>		
<b>Language:</b>		

- offered only in German

**Notes:**

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Group work: Preparing and giving a presentation in the seminar

Module examination(s):

- PY1000-L1: Human biology, written exam, 90min, 100% of the module grade

<b>PY1100-KP07 - Developmental Psychology (EP)</b>		
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each winter semester	<b>Credit points:</b> 7
<b>Course of study, specific field and term:</b> <ul style="list-style-type: none"> <li>• Bachelor Psychology 2027 (compulsory), psychology, 1st semester</li> <li>• Bachelor Psychology 2016 (compulsory), psychology, 1st semester</li> <li>• Master Media Informatics 2020 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Occupational Therapy 2018 (optional subject), psychology, 3rd or 5th semester</li> <li>• Master Media Informatics 2014 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2020 (compulsory), psychology, 1st semester</li> </ul>		
<b>Classes and lectures:</b> <ul style="list-style-type: none"> <li>• lecture in Developmental Psychology (lecture, 2 SWS)</li> <li>• course in Developmental Psychology (seminar, 2 SWS)</li> </ul>		<b>Workload:</b> <ul style="list-style-type: none"> <li>• 150 Hours private studies and exercises</li> <li>• 60 Hours in-classroom work</li> </ul>
<b>Contents of teaching:</b> <ul style="list-style-type: none"> <li>• Core concepts, theories and methods in developmental psychology</li> <li>• Physical development, cognitive development, Piaget, information processing theory, attachment theories, psychosocial development, moral</li> <li>• Basic scientific approaches and empirical findings on selected aspects of lifespan development and contextual factors</li> <li>• Prenatal development</li> <li>• Infancy and toddlerhood</li> <li>• Early and middle childhood</li> <li>• Adolescence</li> <li>• Early and middle adulthood</li> <li>• Old age and death</li> </ul>		
<b>Qualification-goals/Competencies:</b> <ul style="list-style-type: none"> <li>• Students will know how to explain and interpret findings in developmental psychology on the basis of different theoretical views</li> <li>• Students will be able to infer expert knowledge to specific developmental issues</li> <li>• Students will be able to generate hypotheses in order to explain and predict research questions in developmental psychology</li> <li>• Students will learn how to assess the validity of empirical studies concerning a variety of problems in developmental psychology</li> </ul>		
<b>Grading through:</b> <ul style="list-style-type: none"> <li>• written exam</li> </ul>

**PY1300-KP06 - Basics of Experimental and Scientific Work (Empirie)**

**Duration:**

1 Semester

**Turnus of offer:**

each winter semester

**Credit points:**

6

**Course of study, specific field and term:**

- Bachelor Psychology 2027 (compulsory), psychology, 1st semester
- Master Auditory Technology 2022 (optional subject), psychology, 1st semester
- Master Auditory Technology 2017 (optional subject), psychology, 1st semester
- Bachelor Psychology 2020 (compulsory), psychology, 1st semester
- Bachelor Psychology 2016 (compulsory), psychology, 1st semester

**Classes and lectures:**

- lecture in basics in statistics I (lecture, 2 SWS)
- practice in empirical-scientific working (exercise, 2 SWS)

**Workload:**

- 120 Hours private studies and exercises
- 60 Hours in-classroom work

**Contents of teaching:**

- Psychological Science
- Features of the empirical sciences
- Brief review on the history of psychological science
- PLANNING RESEARCH:
- Hypotheses and Theories
- Operationalising your research question
- Ethics of psychological testing
- Rules of good scientific practice
- MEASURING:
- To observe, to count, to measure
- Quantitative methods of data acquisition
- Objective, reliable, valid: Basics of classical testing theory
- Levels of measurement
- PERFORMING RESEARCH:
- Study design
- Confounding variables and their control
- Sample and Population
- The idea of hypothesis testing
- Writing up your results
- Principles of statistical hypothesis testing
- The psychological examination report
- Introduction to the computer-aided analysis of empirical research data

**Qualification-goals/Competencies:**

- The ability to conceive and test research hypotheses according to the scientific criteria in psychology
- The ability to transform research questions into research designs
- Initial competence to understand, to criticise and to write scientific reports
- Mastering the rules of good scientific practice
- Developing a critical, scientific mind
- Students master the basics of computer-aided coding, processing and analysis of empirical research data

**Grading through:**

- written exam

**Responsible for this module:**

- [Prof. Dr. rer. nat. Jonas Obleser](#)

**Teacher:**

- [Department of Psychology](#)
- [Prof. Dr. rer. nat. Jonas Obleser](#)

**Literature:**

- Hussy, W., Schreier, M., & Echterhoff, G.: Forschungsmethoden in Psychologie und Sozialwissenschaften für Bachelor - Berlin [u.a.]: Springer, 2010
- Sedlmeier, P., & Renkewitz, F: Forschungsmethoden und Statistik in der Psychologie - München [u.a.]: Pearson Studium, 2008
- Huber, O.: Das psychologische Experiment: Eine Einführung - (5. Aufl.) Bern: Huber, 2009

**Language:**

- offered only in German

**Notes:**

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- 50% passed quizzes/tests

Module examination(s):

- PY1300-L1: Fundamentals of empirical-scientific work, written exam, 90 min, 100% of the module grade

<b>PY1800-KP06 - Statistics 1 (Statistik1)</b>		
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each winter semester	<b>Credit points:</b> 6
<b>Course of study, specific field and term:</b> <ul style="list-style-type: none"> <li>• Bachelor Psychology 2027 (compulsory), psychology, 1st semester</li> <li>• Bachelor Psychology 2020 (compulsory), psychology, 1st semester</li> <li>• Bachelor Psychology 2016 (compulsory), psychology, 2nd semester</li> </ul>

**PY2903-KP04, PY2903 - Practical Course Physiology (PraktPhys)**
**Duration:**

1 Semester

**Turnus of offer:**

each summer semester

**Credit points:**

4

**Max. group size:**

12

**Course of study, specific field and term:**

- Bachelor Psychology 2027 (optional subject), psychology, 2nd semester at the earliest
- Bachelor Psychology 2013 (optional subject), psychology, 4th semester at the earliest
- Bachelor Psychology 2016 (optional subject), psychology, 3rd semester at the earliest
- Bachelor Psychology 2020 (optional subject), psychology, 2nd semester at the earliest

**Classes and lectures:**

- Practical Course Physiology (practical course as compact course, 2,5 SWS)

**Workload:**

- 80 Hours private studies and exercises
- 40 Hours in-classroom work

**Contents of teaching:**

- Physiological Studies in Men:
- (A) Analysis of the EEG during waking and sleeping, analysis of event-related potentials (ERP, aEP, P300)
- (B) General sensory physiology, special sensory physiology (thermoreception, cutaneous mechanosensors, taste, smell, sense of equilibrium)
- (C) Sense of sight (reflexes of the eye, ophthalmoscopy, perimetry, accommodation, color vision)
- (D) Sense of hearing (audiometry, auditory orientation in space, voice analysis)
- (E) Muscle physiology and spinal motor reflexes

**Qualification-goals/Competencies:**

- Students have knowledge about the theory of physiological trials and are able to perform these tests.

**Grading through:**

- Oral examination

**Requires:**

- Human Biology (PY1000-KP05)

**Responsible for this module:**

- Dr. Benedikt Fels

**Teacher:**

- [Institut of Physiology](#)
- Dr. Benedikt Fels
- Prof. Dr. rer. nat. Kristina Kusche-Vihrog

**Literature:**

- Birbaumer N & Schmidt RF, Hrsg., 7. Aufl.: Biologische Psychologie - Springer, Heidelberg 2010

**Language:**

- offered only in German

**Notes:**

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Regular attendance (at least 80%)

Module examination(s):

- PY2903-L1: Practical course in physiology, oral examination, 60 min, 100% of the module grade

Maximum of 12 participants possible.

**PY3203-KP04 - Coaching in the Work Context (Coaching)**
**Duration:**

1 Semester

**Turnus of offer:**

on request

**Credit points:**

4

**Course of study, specific field and term:**

- Bachelor Psychology 2027 (optional subject), psychology, 3rd or 5th semester
- Bachelor Psychology 2020 (optional subject), psychology, 3rd or 5th semester

**Classes and lectures:**

- PY3203-KP04 Coaching im Arbeitskontext (seminar, 2 SWS)

**Workload:**

- 80 Hours private studies
- 30 Hours in-classroom work

**Contents of teaching:**

- Processes, topics and methods in coaching
- Communication techniques
- Case studies on typical coaching topics such as career development, stress, work-life balance or employee motivation
- Design of coaching processes
- Conducting coaching tools in role plays

**Qualification-goals/Competencies:**

- Getting to know typical processes, topics and methods in coaching
- Acquisition of skills to design client-oriented coaching processes
- Practice of coaching tools as a coach and reflection on their practical application
- Advancing communication skills
- Gaining Experience with coaching tools as a client

**Grading through:**

- Written report
- presentation
- B-Certificate (not graded)

**Responsible for this module:**

- None

Admission requirements for participation in module examination(s):

- None

Module examination(s):

- PY1909-L1: Phenomenon Memory, Active participation, 100% of the module grade

This course is based on the system of problem-based learning. Students develop their own questions and then work out the relevant background information (all with the support of the lecturer). Apart from the introductory session and the final presentations, there is therefore no frontal teaching. This course is therefore suitable for students who are interested in continuously acquiring knowledge themselves and actively discussing it. In order to enable effective work and good supervision, this seminar is only designed for a small number of students.

Preliminary examination work is deemed to have been completed if it has been assessed as at least sufficient.

<b>PY2501-KP04 - Specialization Biological Psychology (VertBioPsy)</b>		
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each winter semester	<b>Credit points:</b> 4

**PY2905-KP04, PY2905 - Emotion Regulation (Emreg)**
**Duration:**

1 Semester

**Turnus of offer:**

each winter semester

**Credit points:**

4

**Course of study, specific field and term:**

- Bachelor Psychology 2027 (optional subject), psychology, Arbitrary semester
- Master Media Informatics 2014 (optional subject), psychology, 3rd semester at the earliest
- Master Media Informatics 2020 (optional subject), psychology, Arbitrary semester
- Bachelor Psychology 2016 (optional subject), psychology, 3rd semester at the earliest
- Bachelor Psychology 2020 (optional subject), psychology, 3rd semester at the earliest

**Classes and lectures:**

- course in emotion regulation (seminar, 2 SWS)

**Workload:**

- 90 Hours private studies and exercises
- 30 Hours in-classroom work

**Contents of teaching:**

- Emotion regulation: Basics and theoretical models
- Clinical diagnostics of skills for regulating emotions
- Stress management and emotion regulation
- Comparison of different strategies for regulating emotions
- Relevance of emotion regulation for various mental disorders
- Therapeutic interventions to enhance the levels of adaptive emotion regulation skills

**Qualification-goals/Competencies:**

- Students are able to define basic concepts of emotion regulation.
- They are able to explain current theoretical models of emotion regulation.
- They are able to compare different strategies of emotion regulation.
- They are able to transfer research findings in the field of emotion regulation to clinical and therapeutic practice.
- They are able to judge original research papers on emotion regulation
- They are able to create a poster for a written and an oral presentation of clinical research findings.

**Grading through:**

- active participation in the exercises

**Responsible for this module:**

- [Prof. Dr. rer. nat., Dipl.-Psych. Frieder Paulus](#)

**Teacher:**

- [Clinic of Psychiatry and Psychotherapy](#)
- [P.Pth. Alena Senft](#)

**Literature:**

- Gross, J.J. (Hrsg.). (2013): Handbook of emotion regulation. New York - The Guilford Press

**Language:**

- offered only in German

**Notes:**

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Reading the relevant texts and active participation (50%) in the seminar

Module examination(s):

- PY2908-L1: Emotion regulation, portfolio examination, presentation, 100% of the module grade

Grade weighting:

- Reading the relevant texts and active participation (50%) in the seminar
- Designing and giving a presentation; presentation 45-60 minutes (influence on the grade: 25%)
- Organization of an interactive discussion and/or group work following the presentation; 20-35 minutes (influence on the grade: 25%)

The examination is deemed to have been completed if it is graded as at least sufficient.

**PY2924-KP04 - Psychoanalysis - science or pseudoscience (Psychoan)**

<b>Duration:</b>	<b>Turnus of offer:</b>	<b>Credit points:</b>	<b>Max. group size:</b>
1 Semester	each summer semester	4	20
<b>Course of study, specific field and term:</b>			
<ul style="list-style-type: none"> <li>• Bachelor Psychology 2013 (optional subject), psychology, 3rd semester at the earliest</li> <li>• Bachelor Psychology 2016 (optional subject), psychology, 3rd semester at the earliest</li> <li>• Bachelor Psychology 2020 (optional subject), psychology, 3rd semester at the earliest</li> </ul>			
<b>Classes and lectures:</b>		<b>Workload:</b>	
<ul style="list-style-type: none"> <li>• Psychoanalysis - science or pseudoscience (seminar, 2 SWS)</li> </ul>		<ul style="list-style-type: none"> <li>• 75 Hours private studies</li> <li>• 25 Hours in-classroom work</li> </ul>	
<b>Contents of teaching:</b>			
<ul style="list-style-type: none"> <li>• With psychoanalysis, Freud established a science in the context of medicine, the natural sciences and the humanities of his time, and in doing so he developed its therapeutic objective separately from its claim to a specific knowledge of the psychic apparatus or dream work. Freud was thus intent on providing evidence for the character of scientificity, justifiable knowledge, and knowledge boundaries. But what constitutes the special status of psychoanalysis as a science, and under what scientific theoretical conditions can its specific scientific character be determined? Freud himself offers numerous possibilities in this regard, but his explanations are by no means conclusive or unambiguous. Regardless of Freud's own reflection, psychoanalysis has been repeatedly subjected to the question of whether it is an empirical science that still has to prove its hypotheses experimentally, a science of the unconscious or even a pseudo-science. These questions have been hotly debated since the 1970s at the latest. In the debates about the status of the scientificity of psychoanalysis, the arguments are based almost exclusively on Freudian teachings. In the debates known as the Freud Wars, not only are Freud's theories being debated, but also the legitimization and <i>raison d'être</i> of psychoanalysis as a science in general. Philosophical considerations, such as those of Paul Ricoeur and Jürgen Habermas, offer alternative reconstructions of psychoanalytical findings, but may not do justice to the Freudian enterprise. And finally, in recent times, effectiveness studies of evidence-based medicine have devoted themselves primarily to the question of whether or not psychoanalysis as a form of therapy is demonstrably helpful. Evidence of scientificity and effectiveness, however, presupposes a scientifically influenced scientism.</li> <li>• The seminar is not intended to contribute to the rehabilitation of Freudian teaching, but to promote critical self-reflection and to discuss the preconditions and cultural problems of science at all, which are associated with the question of the scientific nature of psychoanalysis. No special previous knowledge regarding the topics to be dealt with is assumed. What is expected, however, is a willingness to engage intensively with the underlying texts, to read them extensively and independently, and to participate actively in the discussions. The assumption of an impulse presentation as well as the writing of reading diaries on the basis of the texts to be discussed in the respective session are part of the examination.</li> </ul>			
<b>Qualification-goals/Competencies:</b>			
<ul style="list-style-type: none"> <li>• faculty of criticism; theory understanding</li> <li>• reflection and discursive delivery on important texts and arguments; epistemology and theoretical foundation of psychology and psychoanalysis</li> <li>• Epistemological critique of psychology and psychoanalysis</li> <li>• Writing smaller texts and the development of scientific questions</li> </ul>

<ul style="list-style-type: none"> <li>• German and English skills required</li> </ul>		
<b>Notes:</b>		

Prerequisites for taking the module:

- None

Prerequisites for participation in module examination(s):

- group work (during the semester).

Exam:

- PY2901-L1: On finding, recognizing and applying an appropriate study: epidemiological tools for evidence-based psychology, exam assignment e-test, 90min, 100% of module grade

**PY2912-KP04, PY2912 - Nonparametric Methods (NonparaVer)**
**Duration:**

1 Semester

**Turnus of offer:**

each summer semester

**Credit points:**

4

**Course of study, specific field and term:**

- Bachelor Psychology 2016 (optional subject), psychology, 4th semester at the earliest
- Bachelor Psychology 2020 (optional subject), psychology, 4th semester at the earliest
- Bachelor Psychology 2027 (optional subject), psychology, 4th semester at the earliest

**Classes and lectures:**

- Nonparametric Methods (seminar, 2 SWS)

**Workload:**

- 90 Hours private studies
- 30 Hours in-classroom work

**Contents of teaching:**

- Nonparametric methods in the classical sense: Spearman, Wilcoxon, Mann-Whitney U, Kruskal-Wallis, Friedman
- Nonparametric estimation methods: Jackknife, Bootstrap
- Nonparametric test procedures: Permutation tests, randomization tests
- Nonparametric methods in the extended sense: Jackknife, Bootstrap
- Develop and apply non-parametric test statistics yourself
- Simulations (especially in Matlab)
- Simulate the statistical power of nonparametric tests
- Implementing appropriate statistics from the specialist literature

**Qualification-goals/Competencies:**

- Get to know and apply non-parametric methods, in the narrower and broader sense
- Independently find and apply non-parametric solutions to estimation and testing problems
- Search for and implement appropriate software solutions yourself (manually, Matlab, R, possibly Excel)

**Grading through:**

- B-Certificate (not graded)

**Responsible for this module:**

- [Prof. Dr. rer. nat. Jonas Obleser](#)

**Teacher:**

- [Department of Psychology](#)
- [Prof. Dr. rer. nat. Jonas Obleser](#)
- [PD Dr. rer. nat. Malte Wöstmann](#)
- [Dr. rer. nat. Mohsen Alavash](#)

**Literature:**

- :

**Language:**

- Will be offered using an audience-oriented mixture of German and English

**Notes:**

Admission requirements for taking the module:

- regular attendance, and
- active participation (peer-instructions, presentations),

Admission requirements for participation in module examination(s):

- None

Module examination(s):

- PY2912-L1: Module name, submission of at least two written and self-programmed

PY3800-KP08 - Occupation qualifying for a profession 1 - Entry into the practice of psychotherapy (BQT1)		
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each semester	<b>Credit points:</b> 8
<b>Course of study, specific field and term:</b> <ul style="list-style-type: none"> <li>• Bachelor Psychology 2027 (compulsory), psychology, 6th semester</li> <li>• Bachelor Psychology 2020 (compulsory), psychology, 4th semester at the earliest</li> </ul>

<b>Notes:</b>		

**Admission requirements for taking the module:**

- The internship can only be started if at least 80 credit points have been acquired or the modules of the first three semesters have been completed and the examination registration has already taken place.

**Admission requirements for participation in module examination(s):**

- Participation in the accompanying exercise

**Module examination(s):**

- PY3800-L1: Professional qualification activity 1, participation in the work placement, 100% of the module grade

The application for this is made independently by the students. The internship is not semester-bound, but the requirements specified in the SGO must be observed.

The internship must be registered with the responsible internship coordinator for approval and its completion must be confirmed by the internship site upon completion. Internship officer / contact: [studium.psychologie@uni-luebeck.de](mailto:studium.psychologie@uni-luebeck.de).

Forms and guidelines for internships can be found at:

<https://www.uni-luebeck.de/studium/studiengaenge/psychologie/service-beratung/formulare.html>. Please send your completed forms to the designated internship coordinator ([studium.psychologie@uni-luebeck.de](mailto:studium.psychologie@uni-luebeck.de)).

PY2611-KP06 - Neuropsychology - Disorders and Diagnostics (NeuroStoer)

<b>Notes:</b>		

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- In accordance with §5 of the licensing regulations for psychotherapists (PsychTh-ApprO), 80% attendance is compulsory in this module. Students who are absent more than 3 times per semester cannot be admitted to the examination. There are no substitutions.

Exam:

- PY2701-L1: Introduction to the therapy of mental disorders, written examination, 90 min, 100% of the module grade

**PY3100-KP06, PY3100 - Educational Psychology (PaedaPsych)**
**Duration:**

1 Semester

**Turnus of offer:**

each winter semester

**Credit points:**

6

**Course of study, specific field and term:**

- Bachelor Psychology 2027 (compulsory), psychology, 5th semester
- Bachelor Psychology 2020 (compulsory), psychology, 5th semester
- Bachelor Psychology 2013 (compulsory), psychology, 5th semester
- Bachelor Psychology 2016 (compulsory), psychology, 5th semester

**Classes and lectures:**

- Educational Psychology (lecture, 2 SWS)
- Educational Psychology (seminar with practical exercises, 1 SWS)

**Workload:**

- 135 Hours private studies and exercises
- 45 Hours in-classroom work

**Contents of teaching:**

- Basic concepts and theories in educational psychology
- Learning, teaching, motivation: behaviorism, cognitive theories and their application in pedagogics
- Learning environments: social conditions of learning and teaching; family; preschool / nursery; school; university; adult education
- Early promotion of children; learning difficulties and cognitive disorders; school achievement and their measurement; intellectual giftedness; negligence and abuse of children; bullying in school context; health; lifelong learning
- Legal as well as family and socio-political aspects of educational and psychological interventions (according to Appendix 1 (2) PsychoThApprO)

**Qualification-goals/Competencies:**

- Students are familiar with theories and methods of didactic concepts in psychology of teaching and learning
- Students understand the impact of different psychological and social concepts on the acquisition of new knowledge
- Students will be able to apply and transfer their knowledge to third parties.
- Students will be able to develop and apply didactical concepts in various contexts.
- They know legal as well as family and socio-political aspects of educational-psychological interventions.

**Grading through:**

- written exam

**Responsible for this module:**

<b>Language:</b> <ul style="list-style-type: none"> <li>• thesis can be written in German or English</li> </ul>		
<b>Notes:</b>		

**Admission requirements for taking the module:**

- (1) Admission to the Bachelor's thesis can only be granted to those who meet the requirements in accordance with § 11 PVO, are at least in the 5th semester and have certificates of achievement from the degree program amounting to at least 120 credit points in accordance with § 5 paragraph 1.
- (2) The modules of the first and second semester must have been successfully completed.

**Admission requirements for participation in module examination(s):**

- Completion of 5 dates of the advanced seminar (see below)

**Module examination(s):**

- PY3900-L1: Bachelor's thesis, written examination + colloquium, 100% of the module grade

Part of the Bachelor's thesis is the attendance of the advanced seminar on the Bachelor's thesis (PY3900). It takes place weekly as required during the lecture period (during the lecture-free period) and aims to present the background, objectives, results and progress of the thesis and to discuss it with other students. Each student is expected to give a presentation on his/her Bachelor's thesis in one event. The theoretical background, planned design, methods, progress, results and interpretation should be presented in the presentation. The advanced seminar may be attended from the 1st semester and should be completed at the latest with the colloquium for the Bachelor's thesis. In addition to the above-mentioned presentation on your own BSc thesis, this includes participation in at least 4 further events, i.e. a total of 5 dates.

(Proportion of Institute of Psychology I to Oberseminar is 100%)

**GW3020-KP05, PT3010-KP05 - Interprofessional Communication and Care (IpKoV)**

<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each winter semester	<b>Credit points:</b> 5
--------------------------------	-------------------------------------------------	----------------------------

**Course of study, specific field and term:**

- Bachelor of Science in Nursing 2020 (compulsory), interdisciplinary comprehensive nursing tasks, 5th semester
- Bachelor Psychology 2020 (optional subject), Interdisciplinary modules, Arbitrary semester
- Bachelor Applied Nursing (part-time) 2022 (compulsory), interdisciplinary comprehensive nursing tasks, 5th semester
- Bachelor Occupational Therapy/ speech therapy 2022 (compulsory), Overarching action in health care, 1st semester
- Bachelor Physiotherapy 2022 (compulsory), Scientific theory and practice, 7th semester
- Bachelor of Science in Nursing 2020 (compulsory), interdisciplinary comprehensive nursing tasks, 5th semester
- Bachelor of Science in Nursing 2018 (compulsory), interdisciplinary comprehensive nursing tasks, 5th semester
- Bachelor Physiotherapy 2018 (compulsory), Scientific theory and practice, 5th semester
- Bachelor of Science in Nursing 2017 (compulsory), interdisciplinary comprehensive nursing tasks, 5th semester
- Bachelor Physiotherapy 2017 (compulsory), Scientific theory and practice, 5th semester
- Bachelor Occupational Therapy 2018 (compulsory), Overarching action in health care, 1st semester
- Bachelor Physiotherapy 2016 (compulsory), Scientific theory and practice, 5th semester

**Classes and lectures:**

- Communication in complex care situations (exercise, 1 SWS)
- Inteprofessional decision and action in complex care situations (seminar, 2 SWS)

**Workload:**

- 105 Hours private studies
- 45 Hours in-classroom work

**Contents of teaching:**

- Interprofessional collaboration and communication: fundamentals, theories, practical application
- Interprofessional concepts in the healthcare system
- Principles of person-centred care
- Case work, interprofessional case conferences, handover
- Interprofessional skills training and communication training

**Qualification-goals/Competencies:**

- Students are familiar with theories of verbal and non-verbal communication and are able to conduct appropriate and job-related conversations with patients, relatives and persons from interdisciplinary subjects.
- They are able to independently conduct and analyse interprofessional case conferences, recognising cultural differences and adapting their communication accordingly.
- They are able to formulate precise oral and written reports.
- They can describe and explain the core elements of person-centred care.
- They are aware of the importance of successful interprofessional collaboration for person-centred care and can describe and justify scientifically proven conditions and characteristics of successful interprofessional collaboration.
- They can analyse exemplary situations in the care of chronically and/or multiply and/or severely ill people with regard to the requirements for interprofessional collaboration and develop evidence-based strategies for the implementation of person-centred interprofessional care.
- They have an in-depth understanding of the roles and tasks of the health professions involved in the module and actively integrate these into their own professional practice.

**Grading through:**

- Project work with documentation and presentations

**Responsible for this module:**

- [Prof. Dr. Katrin Balzer](#)

**Teacher:**

- [Institute of Health Sciences](#)
- [Institute for Social Medicine and Epidemiology - Section for Research and Teaching in Nursing](#)
- [Prof. Dr. Katrin Balzer](#)
- Saphira Anstett, B.Sc.
- PD Annette Fox-Boyer, PhD

- Frederike Lüth, M.Sc.
- Katrin Rösner, M.Sc.
- Melanie Kruschinski, B.Sc.
- Katharina Tolksdorf, M.Sc.
- Magdalena Scheytt, MScPH
- Martina Nachtsheim, B.Sc.
- Anne Jarck, M.Sc.

**Language:**

- offered only in German

**Notes:**

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Active participation in practical exercises (skills training, communication training, handover, case work, minimum 80% attendance) in accordance with the requirements specified at the beginning of the semester

Module exam(s):

- GW3020-L1: Interprofessional communication and care, project work with documentation and presentations, 100% of the module grade.

For students of occupational therapy and speech therapy (SGO WS22) and physiotherapy (SGO WS22), the examination is ungraded (B certificate).

For nursing students (Nursing 2020), practice hours are integrated into this module.

(Share of the Institute of Health Sciences in Ü is 40%)

(Share of Institute of Social Medicine and Epidemiology- Nursing Section in Ü is 60%)

(Share of Institute of Health Sciences in S is 15%)

(Share of Institute of Social Medicine and Epidemiology - Nursing Section in S is 75%)

(Share of Institute of Social Medicine and Epidemiology - Nursing Section in P is 60%)

(Share of Institute of Health Sciences in P is 40%)

**MZ3510-KP04 - Functional Neurological Disorders (FNS)**
**Duration:**

1 Semester

**Turnus of offer:**

each semester

**Credit points:**

4

**Course of study, specific field and term:**

- Bachelor Interdisciplinary Courses for health sciences (optional subject), interdisciplinary competence, Arbitrary semester
- Bachelor Psychology 2020 (optional subject), interdisciplinary competence, Arbitrary semester

**Classes and lectures:**

- Functional Neurological Disorders (seminar, 2 SWS)

**Workload:**

- 90 Hours private studies
- 30 Hours in-classroom work

**Contents of teaching:**

- Kinds of functional neurological disorders
- Diagnostic criteria of the disease
- Important neurophysiological and imaging findings in research
- Therapeutic strategies

**Qualification-goals/Competencies:**

- Students will be able to distinguish between different functional neurological disorders.
- They will be able to apply clinical diagnostic criteria.
- They will be able to understand and critically evaluate scientific neurophysiological and imaging research.

**Grading through:**

- presentation

**Responsible for this module:**

- [PD Dr. med. Anne Weißbach](#)

**Teacher:**

- [Institute of Systems Motor Science](#)
- [PD Dr. med. Anne Weißbach](#)
- Christina Bolte, M.Sc.
- Dr. rer. nat. Julius Verrel
- Feline Hamami, M.Sc.
- Christof Degen-Plöger, M.Sc.

**Literature:**

- : Literature will be provided in the seminar or independently researched by the students

**Language:**

- offered only in German

**Notes:**

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Successful participation in the seminar as specified at the beginning of the semester.

Module Exam(s):

- MZ3510-L1: Functional Neurological Disorders, Presentation, 10-15min, 100% of the module grade

**PS1510-KP04 - Planetary Health - Healthy Earth, Healthy People (PIHe)**

<b>Duration:</b>	<b>Turnus of offer:</b>	<b>Credit points:</b>	<b>Max. group size:</b>
1 Semester	every summer semester	4	20

**Course of study, specific field and term:**

- Bachelor Interdisciplinary Courses for health sciences (optional subject), interdisciplinary competence, Arbitrary semester
- Bachelor Psychology 2020 (optional subject), interdisciplinary competence, Arbitrary semester

**Classes and lectures:**

- PS1510-S: Planetary Health - Healthy Earth, Healthy People (seminar, 2 SWS)

**Workload:**

- 65 Hours private studies
- 30 Hours in-classroom work
- 25 Hours private studies and exercises

**Contents of teaching:**

- Basics Climate and health crisis
- Introduction to Planetary Health
- The physiological limits of human heat adaptation
- Air pollution
- Changes in pollen and allergies due to environmental and climate changes
- Environmental change and economic crisis as drivers of pandemics
- Bacteria and other microorganisms: waterborne and vector-borne infectious diseases
- Nutrition and influence on planetary health
- Mental health: Effects of extreme weather events
- Child health in the context of planetary health
- Climate and health equity
- Communication in the context of ecological crises and planetary health
- From knowledge to transformative action
- Developing own project ideas for transformative action

**Qualification-goals/Competencies:**

- Students will be able to explain the concept of Planetary Health and the links between human health and the state of natural systems
- They can classify the significance of Planetary Health for their own role in the health sector and recognise the need for transformation
- They can classify the scientific background to the topic
- They can demonstrate and justify competences on the topic of 'climate change and health' in the clinical field of work
- They can highlight professional self-reflection on the topic and the importance of the topic for the medical profession

**Grading through:**

- Oral presentation and written report

**PY2904-KP04, PY2904 - Media Psychology (MedienPsy)**

**Duration:**

1 Semester

**Turnus of offer:**

each summer semester

**Credit points:**

4

**Course of study, specific field and term:**

- Bachelor Psychology 2013 (optional subject), psychology, Arbitrary semester
- Bachelor Media Informatics 2020 (compulsory), psychology, 4th semester
- Bachelor Psychology 2016 (optional subject), psychology, Arbitrary semester
- Bachelor Biophysics 2016 (optional subject), no specific field, 6th semester
- Bachelor Psychology 2020 (optional subject), psychology, Arbitrary semester
- Bachelor Media Informatics 2014 (compulsory), psychology, 4th semester
- Bachelor Psychology 2027 (optional subject), psychology, Arbitrary semester

**Classes and lectures:**

- Media Psychology (lecture, 2 SWS)
- Media Psychology (seminar, 1 SWS)

**Workload:**

- 75 Hours private studies and exercises
- 45 Hours in-classroom work

**Contents of teaching:**

- Media selection, media use, media reception
- Media effects
- Media competency
- Persuasive technology, gamification
- Advertising, social networks
- Public Relations
- Human-computer interaction, companion technologies

**Qualification-goals/Competencies:**

- The students can explicate theories and findings of media psychology using digital media as examples.
- They are able to draw conclusions from media psychology's scientific contributions regarding multimedia and interactive media and to judge media use and media effects based on knowledge of media psychology.
- They are able to analyse and to evaluate digital media with methods from media psychology.

**Grading through:**

- portfolio exam - the concrete examination elements and their weights will be published in the course

**Responsible for this module:**

- [Prof. Dr. rer. nat. Thomas Franke](#)

**Teacher:**

- [Institute for Multimedia and Interactive Systems](#)
- [Prof. Dr. rer. nat. Thomas Franke](#)
- MitarbeiterInnen des Instituts

**Literature:**

- B. Batinic & M. Appel (Hrsg.): Medienpsychologie - Heidelberg: Springer, 2008
- S. Trepte & L. Reinecke: Medienpsychologie - Stuttgart: Kohlhammer, 2013
- :

**Language:**

- offered only in German

**Notes:**

Prerequisites for attending the module:

- None

Prerequisites for the exam:

- Successful completion of homework assignments during the semester.

Exam(s):

- PY2904-L1 Medienpsychologie, Portfolioprfung, semesterbegleitend, 100% der Modulnote

<b>PY2913-KP04 - Developmental psychology of adult age (EPErwachs)</b>		
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each summer semester	<b>Credit points:</b> 4
<b>Course of study, specific field and term:</b> <ul style="list-style-type: none"> <li>• Bachelor Psychology 2016 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2020 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2027 (optional subject), psychology, Arbitrary semester</li> </ul>		
<b>Classes and lectures:</b> <ul style="list-style-type: none"> <li>• Developmental psychology of adult age (seminar, 2 SWS)</li> </ul>	<b>Workload:</b> <ul style="list-style-type: none"> <li>• 80 Hours private studies and exercises</li> <li>• 30 Hours in-classroom work</li> </ul>	
<b>Contents of teaching:</b> <ul style="list-style-type: none"> <li>• Basic assumptions and concepts of developmental psychology of life span</li> <li>• adolescent developmental contexts</li> <li>• Social relations in adulthood</li> <li>• Development of motivation, personality, self, well-being and health</li> <li>• Relationship between profession, work and development</li> <li>• Interventions to promote development and prevent development problems</li> <li>• Dying and death</li> <li>• Science communication and concept development</li> </ul>		
<b>Qualification-goals/Competencies:</b> <ul style="list-style-type: none"> <li>• The students know basic concepts, theories and methods of developmental psychology of adulthood</li> <li>• Students can derive specialist knowledge from scientifically sound judgements on specific questions of developmental psychology in adulthood</li> <li>• The students can pass on their acquired knowledge to third parties in an advisory capacity</li> <li>• The students are able to discuss developmental psychological concepts in a group</li> </ul>		
<b>Grading through:</b> <ul style="list-style-type: none"> <li>• B-Certificate (not graded)</li> <li>• active participation in the exercises</li> </ul>		
<b>Responsible for this module:</b> <ul style="list-style-type: none"> <li>• <a href="#">Prof. Dr. rer. nat. Nico Bunzeck</a></li> </ul> <b>Teacher:</b> <ul style="list-style-type: none"> <li>• <a href="#">Department of Psychology</a></li> <li>• <a href="#">Heike Sönnichsen</a></li> </ul>

<b>Language:</b> <ul style="list-style-type: none"> <li>• Will be offered using an audience-oriented mixture of German and English</li> </ul>			
<b>Notes:</b>			

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Seminar performance is deemed to have been achieved if at least 80% of the exercises have been successfully completed. Bachelor's and Master's students fulfill different levels of difficulty.

Module examination(s):

- PY2919-L1: Module name, exercises, submission, 100% of the module grade

Previous knowledge of Matlab is required, e.g. for Bachelor students: PY2917, for Master students: PY4880. Alternatively, Matlab introductory videos and tutorials can be worked through independently (<https://de.mathworks.com/support/learn-with-matlab-tutorials.html>). The Matlab Onramp course shows the most important commands and ways of working with Matlab. All tutorials on Mathworks.com are free of charge for students and employees of the University of Lübeck; a Mathworks account is required, which can be obtained via [uni-luebeck.de](http://uni-luebeck.de) or the [student.uni-luebeck.de](mailto:student.uni-luebeck.de) email address.

The course can also be offered in English, if desired by all. Previous knowledge of Matlab required, e.g. for Bachelor students PY2917-KP04, for Master students PY4880-KP04.

PY2926-KP04 - Advanced Methods in Stimulus programming using Psychtoolbox (PTB) with Matlab (StimPTB2)			
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> each summer semester	<b>Credit points:</b> 4	<b>Max. group size:</b> 20
<b>Course of study, specific field and term:</b>			
<ul style="list-style-type: none"> <li>• Master Psychology - Cognitive Systems 2027 (optional subject), psychology, Arbitrary semester</li> <li>• Master Auditory Technology 2022 (optional subject), psychology, 2nd semester</li> <li>• Master Psychology - Cognitive Systems 2022 (optional subject), psychology, Arbitrary semester</li> <li>• Master Psychology 2016 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2016 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2020 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2027 (optional subject), psychology, Arbitrary semester</li> </ul>			
<b>Classes and lectures:</b>		<b>Workload:</b>

**PY3202-KP04 - Work- an Organizational Psychology in Practice (AOPP)**

**Duration:**

1 Semester

**Turnus of offer:**

irregularly

**Credit points:**

4

**Course of study, specific field and term:**

- Bachelor Psychology 2027 (optional subject), psychology, Arbitrary semester
- Bachelor Psychology 2016 (optional subject), psychology, Arbitrary semester
- Bachelor Psychology 2020 (optional subject), psychology, Arbitrary semester

**Classes and lectures:**

- Work- an Organizational Psychology in Practice (seminar, 2 SWS)

**Workload:**

- 90 Hours private studies and exercises
- 30 Hours in-classroom work

**Contents of teaching:**

- Background in conducting project work: structure and process organization and typical templates and documentation
- Communication in project settings
- Communication techniques in managing project stakeholders
- Background for task delegation in hospital settings
- Exercise at the example of an implementation of a task delegation case in the hospital with the participation of all professions
- Reflection on the case itself
- Management of health care teams

**Qualification-goals/Competencies:**

- Getting to know typical processes, topics and methods in project management
- Acquisition of skills to structure projects
- Practice of tools and methods to encounter stakeholder in project settings
- Advancing communication skills
- Gaining Background in the specific case of duty delegation

**Grading through:**

- written and oral case study
- B-Certificate (not graded)
- Active Participation

**Responsible for this module:**

- [Prof. Dr. Corinna Peifer](#)

**Teacher:**

- [Department of Psychology](#)
- [P.D. Dr. med., MBA Christian Elsner](#)

**Literature:**

- Seminar document:
- Sample project management documents and samples:
- Project management tools:
- Literature on the subject of task delegation:

**Language:**

- offered only in German

**Notes:**

Admission requirements for taking the module:

- None

Admission requirements for participation in module examination(s):

- Coursework is to be completed as active contributions to discussions and participation in the practical exercise units

Module examination(s):

- PY3202-L1: Work psychology and organizational psychology in practice, seminar assignment, submission, 100% of the module grade

The examination consists of an examination of the theory of project management and the case background, processing of the case

PY4011-KP04 - Statistical Cognition - Recognizing and avoiding common statistical traps (StatDenke)			
<b>Duration:</b> 1 Semester	<b>Turnus of offer:</b> irregularly	<b>Credit points:</b> 4	<b>Max. group size:</b> 20
<b>Course of study, specific field and term:</b>			
<ul style="list-style-type: none"> <li>• Bachelor Psychology 2027 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2020 (optional subject), psychology, Arbitrary semester</li> <li>• Bachelor Psychology 2016 (optional subject), psychology, Arbitrary semester</li> <li>• Master Psychology 2016 (optional subject), psychology, Arbitrary semester</li> </ul>			
<b>Classes and lectures:</b>		<b>Workload:</b>	
<ul style="list-style-type: none"> <li>• PY4011-W: Statistical Cognition Recognizing and avoiding common statistical traps (seminar, 2 SWS)</li> </ul>		<ul style="list-style-type: none"> <li>• 90 Hours private studies</li> <li>• 30 Hours in-classroom work</li> </ul>	
<b>Contents of teaching:</b>			
<ul style="list-style-type: none"> <li>• Common errors in the statistical analysis of empirical data</li> <li>• Logical fallacies in the interpretation of research findings</li> <li>• Deficiencies in human patterns of thought</li> <li>• Discrepancies of intuitive and formal logic</li> <li>• Simple data simulation in MatLab</li> </ul>			
<b>Qualification-goals/Competencies:</b>			
<ul style="list-style-type: none"> <li>• Recognize errors and logical fallacies in research results</li> <li>• Acquire skills to adapt experimental design and statistical analyses in order to avoid common fallacies</li> <li>• Acquire skills to implement data simulations with the goal to recognize and quantify implications of common fallacies</li> <li>• Critical reflection of logical conclusions and of statistical analysis techniques</li> </ul>			
<b>Grading through:</b>			
<ul style="list-style-type: none"> <li>• written homework</li> <li>• B-Certificate (not graded)</li> </ul>
