

## Additional Requirement for Application - Master of Robotics and Autonomous Systems

Please fill out and upload this **form together with the evidence required**.

**Without this form and the required evidence your application can unfortunately not be considered.**

Please confirm that you fulfill the following two prerequisites by listing the corresponding modules and credits from the transcript in the table and provide evidence thereof. **Additional it is important to indicate the credits in ECTS**. When a conversion is required, the recalculation and a proof (an excerpt from the module handbook) of the composition of the modules (semester hours per week for theory and practice) must be provided.

You need to prepare the following documents to prove your qualifications:

- This document itself
- Your transcript of records.
- The evidence showing the composition of the modules (semester hours per week for theory and practice). Only the relevant excerpts from the module handbook that correspond to the listed modules should be included - **do not attach the complete module handbooks**. Please provide the information about the specific modules in the same order as they were listed by you in the form.

Accordingly, there are three separate sections where you will upload the documents. If any required proof is missing, unfortunately your application cannot be considered. An example of a completed form and the supporting documents based on our bachelor's program can be found for your information [here](#).

Furthermore, an official confirmation from the university regarding the conversion of your credits into ECTS can be provided and attached to this document. If you know the total workload of a module for a semester (a proof must also be provided for this), you may assume that 1 ECTS credit corresponds to 30 hours of work.

Number of weeks per semester in which teaching actually took place:	
Number of Credits per semester:	
Total number of Credits of bachelor's degree:	
Number of semesters specified in the study regulations:	
The number of semesters you have actually studied:
